# Did You Know?

Women are farmers, workers, and entrepreneurs, but they face more severe constraints than men in accessing productive resources, markets, and services almost everywhere.

Let's empower female farmers to feed the world!

We cannot end hunger and poverty without empowering both men and women in agrifood systems; we need their equality.

Women's equality in agrifood systems could boost the global economy by \$1 trillion, reduce food insecurity by 45 million: new FAO report

Women make up 43% of the global agricultural labour force, yet they face significant discrimination when it comes to land and livestock ownership, equal pay, participation in decision-making entities and access to credit and financial services.
